What are industrial inverters?

Industrial inverters are electrical power converters that change direct current (DC) to alternating current (AC). They are designed for industrial use to safeguard critical loads in places of high power shortage, such as high-rise buildings, offices, and industrial power plants. EnerTech delivers the finest industrial inverters that are efficient in saving energy bills even in the most extreme climatic conditions.

Can industrial inverters be profitable?

Industrial inverters are profitable and are available in single and three-phase versions that work parallel to the grid. Their capacity ranges from 5KVA to 300KVA, and they come with a 32 bit DSP design display. The PFC battery saves 50% of the electricity and has an eight to ten hours battery backup.

What is the EnerTech industrial inverter?

The EnerTech industrial inverter is a state-of-the-art design with high load handling capacity and high frequency. It is built to provide uninterrupted electricity even during a power loss and increases in capacity with the load.

When are solar module and inverter prices updated?

Solar Module Retailer Prices are updated on Monday. Solar System and Inverter Retailer Prices are updated on Friday.
