
Port Moresby 100 square meters of solar air conditioning

Who are Papua New Guinea air conditioning specialists?

The Papua New Guinea air conditioning specialists are SPAC Ltd. We design, install, service and maintain effective cooling solutions for commercial, industrial, domestic and marine clients.

Are Papua New Guinea air conditioning systems free?

SPAC Ltd are pleased to offer a free, no obligation design and quote for all new residential Papua New Guinea air conditioning systems. All installations are done by our licensed and experienced installation technicians and are fully guaranteed.

Why should you choose SPAC for commercial air conditioning in PNG?

SPAC has the experience and knowledge to provide first class commercial air conditioning solutions for all our PNG clients. From large multi-story offices, to hospitals, schools, hotels and even the smallest, single room office space, we do it all.

How much power does a solar air conditioner use?

It depends on the solar-powered air conditioner you choose and how much you use it. Most mini splits use 500-700 watts per hour per evaporator zone. Most residential solar panels make 250-400 watts per hour. That means most solar air conditioners require at least two solar panels. Central air conditioning capacity is measured based on tonnage.

Explore the solar photovoltaic (PV) potential across 9 locations in Papua New Guinea, from Wewak to Port Moresby. We have utilized empirical solar and meteorological data obtained ...
