
Portable power source factory in Burundi

Did Burundi import energy?

Burundi did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used. For example, crude oil is refined into many different kinds of fuels and products, while coal, oil and natural gas can be burned to generate electricity and heat.

What are the different types of energy transformation in Burundi?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Burundi for 2022. Another important form of transformation is the generation of electricity.

How will Burundi transform in 2022?

No data for Burundi for 2022. Another important form of transformation is the generation of electricity. Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions - during which up to half of their energy content is lost.
