# Price of solar container system for Milan data center in Italy

What is Milan data center?

The Milan data center campus is one of the largest dedicated digital campuses in Italy, a hub located between the Mediterranean basin and Europe. A prime location for your hosting projects, whether in shared centers or dedicated buildings. A hyper-connected platform between the Mediterranean basin, Africa and Europe.

How much energy do Italian data centres use?

Italian data centres consume significant amounts of energy. It is estimated that their energy requirements are close to 1 Gigawatt. This high consumption is mainly due to the cooling systems, which are essential to dissipate the heat produced by the servers. Increasing energy consumption in data centres is a global trend.

Is a data center project coming to Italy?

A company is proposing a EUR30 billion (\$33 bn) data center project in Italy, according to a local minister. As reported by Reuters, Industry Minister Adolfo Urso has said Italy has been chosen as the location for a major data center investment by a single foreign corporation.

How big is the data centre market in Italy?
