
Prices of solar modules produced by manufacturers

How much does a PV module cost in China?

According to price analysis firm InfoLink: "Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark." The results of the China Datang Group's 2025-2026 PV module framework. Image: Datang.

How much will PV modules cost in 2025?

On 11 March 2025, the results of the China Datang Group's 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from RMB0.7/W (US\$0.097/W) to RMB0.73/W (US\$0.1/W), and some modules priced as high as RMB0.75/W (US\$0.11/W).

How are PV production costs modeled?

The costs of materials, equipment, facilities, energy, and labor associated with each step in the production process are individually modeled. Input data for this analysis method are collected through primary interviews with PV manufacturers and material and equipment suppliers.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

Comprehensive guide to solar module prices in 2025. Current costs, market trends, buying strategies, and price forecasts. Updated with ...

The world produced over 600GW of solar modules in 2024, which is up 10x from a decade ago. This data-file breaks down solar module production by company and over time, comparing the ...

Solar Manufacturing Cost Analysis NLR analyzes manufacturing costs associated with photovoltaic (PV) cell and module ...

In the short term, further price declines are unlikely. In the long term, cell prices will mainly track upstream raw-material price movements. PV Modules The deepening of the ...

China's latest tender results show the spot price of n-type modules increasing from RMB0.7/W to as much as RMB0.75/W.

In the short term, further price declines are unlikely. In the long term, cell prices will mainly track upstream raw-material price ...

Global module prices trend upward in Q2 In a new weekly update for pv magazine, OPIS, a

Dow Jones company, provides a quick ...

Solar Manufacturing Cost Analysis NLR analyzes manufacturing costs associated with photovoltaic (PV) cell and module technologies and solar-coupled energy storage ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

Global module prices trend upward in Q2 In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV ...

The world produced over 600GW of solar modules in 2024, which is up 10x from a decade ago. This data-file breaks down solar module production ...

Average spot price for solar photovoltaic modules worldwide from 2016 to 2024 (in U.S. dollars per watt-peak) You need a Statista Account for unlimited access Immediate ...
