Where to see the Northern Lights in Iceland?

Iceland has plenty of amazing places to watch the Northern Lights from. Here are a few of them: Westfjords and North of Iceland have longer hours of darkness which means more chances to see the Northern Lights. It is also farther from Reykjavik and the city lights, and its remoteness also offers great conditions to spot the beautiful auroras.

Is Iceland's Northern Lights forecast better than expected?

Iceland's Northern Lights forecast for 21:00-00:00 might be better than expected, with light to moderate activity. Current Aurora conditions have exceeded their forecasts, indicating higher than anticipated solar activity. Solar wind conditions change rapidly, check the latest data here as it becomes available.

When is the best time to see the Northern Lights in Iceland?

Well, sometimes the Northern Lights appear in the sky over the city, but to have the best chances, book a Northern Lights tour going from Reykjavik every evening! October, with around 15 hours of darkness, is one of the best months to see the Northern Lights in Iceland! You can also benefit from the milder weather compared to other winter months.
