
Romania Industrial Park Energy Storage Project

How long will a battery energy storage system last in Romania?

It is about to start building the BESS in Scornicești in Olt county, west of Bucharest. R.Power is planning to complete it in a year. The battery energy storage system would have a duration of two hours, translating to 254 MWh in capacity. The project received funding from the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR).

Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

Will Romania install a battery storage system on the Danube?

State-owned Hidroelectrica, the largest electricity producer in Romania, wants to install a battery storage system at Iron Gate 2 (Poarta de Fier 2) on the Danube. Located on the border with Serbia, it is the second-largest hydroelectric plant in the country, at 252 MW in nominal capacity.

Which companies are combining BESS with solar power in Romania?

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names.

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage system (BESS) in ...

The project consists of a large-scale standalone battery storage facility that Premier Energy expects to construct primarily during 2026, with commissioning anticipated in ...

*** NOVA POWER & GAS, part of the E-INFRA Group, is a 100% Romanian company covering the entire energy chain: production, supply, storage, and major investments in ...

A Strategic Investment in Romania battery storage for Grid Modernization The Electrica Group, a leading player in the Romanian ...

Aukera Energy, co-founded by the Romanian Cătălin Breabu, is launching a 250 MW energy storage project in Gura Ialomiței, financed through the National Recovery Plan.

The largest battery energy storage system (BESS) to date in Romania, with a capacity of 200 MW/400 MWh, has been commissioned in Cluj County by the private investor ...

Nova Power & Gas's 400 MWh project in Cluj County is the largest battery energy storage system (BESS) to date to have been connected to Romania's grid.

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone systems.

Nova Power & Gas, part of the E-INFRA group, has announced the commercial operation of Romania's largest battery energy storage facility, with a capacity of 200 MW and ...

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone ...

A Strategic Investment in Romania battery storage for Grid Modernization The Electrica Group, a leading player in the Romanian energy sector, has announced a significant ...

Romania has commissioned its largest battery energy storage system (BESS) to date: a 200 MW / 400 MWh project in Cluj County, developed by private investor Nova Power & ...
