
Rwanda s first shared power base station

Who is responsible for the development of power stations in Rwanda?

Responsibility for the development of power stations in Rwanda has been currently borne by the private sector, with active involvement from government agencies such as REG and its predecessor EWSA. In October 2014, the largest dam-type hydro-power station in Rwanda, Nyabarongo 1 (28MW), commenced commercial operation.

Why does Rwanda have 84% of schools?

Furthermore, the connection of 84% of schools underscores Rwanda's vision of empowering its youth and creating a solid foundation for future innovation and productivity. This electrification drive is not just about powering homes and facilities; it's about restoring dignity and equity for the African people.

Is Rwanda a good example of transformative development in Africa?

Rwanda's remarkable electrification progress over the past 15 years is a shining example of transformative development in Africa. Increasing electricity access from a mere 6% in 2009 to an impressive 75% today represents one of the fastest rates of electrification expansion globally.

Why is Rwanda a beacon of hope for other countries?

Rwanda's achievement is a beacon of hope for other nations striving for equitable development. It is a testament to what can be accomplished through vision, dedication, and strategic partnerships, reaffirming the continent's potential to lead in sustainable transformation and human development.
