## Sana double glass module manufacturer

What is a dual glass PV module?

The dual glass PV module is a kind of special glass that can be used to generate electricity by solar radiation. It is composed of low-iron glass, solar cells, film, back glass, and special metal wires. It seals the solar cell through a film between a piece of low-iron glass and a back glass, which is the most innovative high-tech for construction.

Does Trina Solar have a bifacial double-glass module?

In March this year, Trina Solar released its next generation of four module series, including its double-glass module's updated version, and bifacial double-glass modules, which will maximize its bifacial generation performance.

What is the best double-glass module?

When it comes to double-glass, Trina Solar's double-glass module is the most sought after product in the market. As one of the first batch of companies that promote and commercialize double-glass modules, Trina Solar makes its double-glass modules, which has won industry-wide recognition for its high quality.

Are double-glass modules hard to remake?

Double-glass modules are hard to remake, because they are no longer based on backing sheet," he continued. Yin's confidence comes from Trina Solar's technical strength. During the past 20 years, Trina Solar has been constantly treading on the path of technological innovation, consistently paying high attention to investment in R&D.
