
Sodium pyroantimonate solar glass

Sodium antimonate which also known as sodium pyroantimonate, is an inorganic salt compound of antimony, a white fine crystalline powder, mainly used as a fining agent or degasser in ...

In the glass manufacturing industry, sodium pyroantimonate and antimony trioxide is also used to manufacture a variety of properties and uses of glass, such as optical glass, infrared ...

Sodium Pyroantimonate, also known as Disodium dihydrogen pyroantimonate, is a hydrated antimony salt commonly used in solar glass, cathode ray tubes (CRT), optical glass, ...

Sodium Pyroantimonate Sodium pyroantimonate is a white crystalline powder. It is an essential additive in glass manufacturing, primarily used as a clarifier and decolorizer. It can effectively ...

Glass accounts for a significant proportion of PV module weight, making glass recycling an environmentally beneficial process due to reduced CO2 emissions and energy ...

Key attributes CAS No. 12507-68-5 Place of Origin Guangdong, China Type Catalysts and chemical auxiliaries Usage Used for photovoltaic solar glass, black and white, color display ...

Good chemical stability. Sodium pyroantimonate is mainly used as clarifying and defoaming agent for photovoltaic solar glass, black and white and color display tube glass.

Sodium Pyroantimonate Nasbo3 CAS No 12507-68-5 for Photovoltaic Solar Glassflame Retardant Sodium Antimonate Powder, Find Details and Price about Sodium Salt ...

Sodium pyroantimonate Sodium pyroantimonate is mainly used as clarifying agent for picture tube glass, optical glass and other glass, also used in enamel, ceramics and flame retardant ...

Overview Sodium pyroantimonate is primarily used as a clarifier and defoamer for photovoltaic solar glass and kinescope glass for black and white and color display screens.
