
Solar Module Price Index

What is the PV module price index?

The PV Module Price Index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange.

How much does a solar module cost in 2025?

Specifically, in August 2025, the Price Index showed: about EUR0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. Manufacturers are moving quickly to end the devastating price war. The Chinese government is gradually phasing out tax incentives and subsidized solar module exports.

How much does a low-cost photovoltaic module cost?

Low-Cost Photovoltaic Modules: Average price of EUR0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

How much does a resale solar module cost?

For example, N-Type modules by REC listed for resale in May and July pushed up weighted average prices to \$0.411 and \$0.460 respectively. P-Type modules in September increased to \$0.311 as modules by Sirius PV, Solar4America, and Panasonic were remarketed. The same price increase was present in P-Type Bifacials for the month of December.

The PV Module Price Index is a resource for solar professionals to accurately track modules traded within the secondary ...

Since our last report, the Module category has expanded to include 2 new entries: the 210 mm HJT module (715-730W) and a China ...

IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price ...

Today EnergyBin announced the release of their fourth annual (2024) PV Module Price Index for the Secondary Solar Market report.

Price Trends: Module prices continued rising, driven by upstream polysilicon, wafer, and cell cost increases. The Price Law Amendment Draft (July 24) explicitly bans below-cost ...

Explore our tool for tracking weekly spot prices of polysilicon, wafers, cells and modules. Check average prices of any component globally and in granular categories such as that for different ...

Updated photovoltaic module prices 2025: in August, high-efficiency solar panels fell to an average of EUR0.12/Wp in Europe.

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

Module Price Index May 2019: Fridays forever Since the last reduction in the German feed-in tariff for medium-sized PV systems at the ...

The 2023 PV module price index presented by EnergyBin tracks crystalline-silicon modules traded within the secondary solar ...

IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies "Thin film a-Si/u-Si or ...

Calendar Week 12 was another positive one for the TaiyangNews PV Price Index, with 5 downstream products recording ...
