## Solar glass in Victoria A

Is solar glass sand a good solution for Victoria's biggest project?

Results so far have been excellent. Dr Ali Nezhad, Head of Sustainability and Innovation at Boral, says: "We're excited to be leading the development of concrete mixes containing solar glass sand, an innovative new product that will be used in Victoria's biggest project in history."

Will recycled sand be used in Victoria's North East Link project?

Share this story Construction materials company Boral has announced that it is trialling recycled sand, sourced from end-of-life and damaged solar panels, in concrete intended for use in Victoria's North East Link project. In a statement on Tuesday, the company said it has used a blend of "up to 50 per cent natural sand" with the crushed glass.

Are solar panels going up on apartment buildings in Victoria?

Thousands of solar panels are going up on apartment buildings across Victoria- cutting energy bills and putting money back into the pockets of families. The Government is extending support for regional families and businesses following Solstice's decision to close its compressed natural gas (CNG) network across Victoria.

How many solar battery systems have been installed in Victoria?

Through solar battery rebates and loans, more than 20,000 solar battery systems have been installed across Victoria. Sign up to our householder newsletter and get the latest renewable energy news, insights and energy-saving tips delivered to your inbox once a month.
