# Solar lights street lights household LED floodlights

Are solar floodlights worth it?

As the name suggests, this type of light illuminates the maximum area among the other products. So, if you are looking for solar lights to cover a large pavement, outdoor sports area, or arena, you can't go wrong with solar floodlights. Although they can be expensive, they are still energy-efficient and worth every penny.

How do I choose the best solar street light?

This guide breaks down key factors like lumens, battery capacity, solar panel type, and installation requirements to help distributors, wholesalers, traders, and retailers choose high-quality products. To choose the best solar street light, consider lumens per watt efficiency, battery capacity, solar panel quality, and installation environment.

What is a solar street light?

A: A solar street light is a street, parking lot or area light that is fully powered by solar energy. Using a battery plus photovoltaic panel, it charges during the day and turns on at night. They come in a large variety of shapes and sizes with optional features such as motion sensors and remote controls.
