
Solar powered devices factory in Atlanta

Where are solar panels made?

A solar panel, or module, is assembled from solar cells most commonly made from wafers cut from ingots of polysilicon. Today, the company's solar cells are imported from Asia.

What's going on with Georgia's solar industry?

Politics envelops the solar industry. Vice President Kamala Harris visited the plant earlier this year. At the state level, Republican Gov. Brian Kemp has wrestled with Democratic U.S. Sen. Jon Ossoff over political credit for electric vehicle and renewable energy investments flowing to Georgia.

Will solar cell manufacturing bolster US energy independence?

"The solar cell is the essential component in solar energy generation. Today's announcement is the first step in rebuilding solar cell manufacturing in the United States, which will bolster our country's energy independence and security" said Matt Card, President and Chief Operating Officer of Suniva.

Will South Korea's new solar panel factory dampen efforts to make more solar?

It's part of the largest clean energy manufacturing investment in American history.

DALTON, Ga. - A South Korean company has begun production at a huge new solar panel factory in Georgia even as industry leaders say surging Asian imports could dampen efforts to make more solar components in the United States.
