# Solar powered house generator in France

What is a solar powered generator?

For anyone looking for a portable power source for both home and outdoors, a solar powered generator keeps you powered on without the noise, fumes, and maintenance of a gas generator. The EcoFlow DELTA Pro is the biggest leap in portable power technology yet.

Are solar-powered generators worth it?

Solar-powered generators used to be a niche product geared towards off-the-grid living. They still do the job in that scenario, but as the market matures, with an ever-expanding range of sizes and configurations, the quiet, emissions-free generators are becoming an essential source of backup power for all kinds of homeowners.

What is the best solar powered generator?

If portability is at the top of your list, the EcoFlow DELTA mini is the best solar powered generator in the DELTA series. It comes in at just 11 kg. And don't let size fool you either -- this compact solar generator offers a huge 1400W output, 300W solar charge input, and EcoFlow app integration. The EcoFlow RIVER Pro makes camping easy.

Can a solar power station be used as a generator?

However, using one effectively is a little more complicated than many people realize.

Technically, these units are electric power stations -- giant battery packs, with the ports you need to plug in solar panels for charging. They can't actually harness solar power -- and thus, act as a generator -- unless you have both.
