
Stockholm substation energy storage power supply bidding

What does the Hall substation upgrade mean for Sweden?

This substation upgrade is the foundation for future development and marks a significant milestone in the ongoing efforts to modernize and expand Sweden's power infrastructure. The Hall substation, supplied by Linxon, replaces an aging substation that had reached the end of its operational lifespan.

Why did Linxon install a 400 kV Hall substation?

Linxon successfully commissions the new 400 kV Hall substation near Stockholm, Sweden, enhancing grid reliability and supporting modernization efforts. Discover how this substation upgrade strengthens Sweden's power infrastructure.

Where will a substation be installed in Stockholm?

The substation will be installed in a double storage building which is partly underground to save precious space in the populated central areas of the capital. The complex site location and transport logistics in the middle of Stockholm are very challenging and require solid project management and project coordination.

Where is the new 400 kV Hall substation located?

Stockholm, Sweden - The new 400 kV Hall substation, located just outside Söderort, 25 kilometers south of Stockholm, has been successfully handed over from Linxon to Svenska kraftnät.

Summary: Explore the latest updates on Stockholm's energy storage tender, including project scope, bidding requirements, and market trends. Learn how renewable integration and grid ...
