
The latest distribution of London power base stations

Where are UK Power Networks' primary substations located?

The dataset provides detailed information about UK Power Networks' Primary Substations within the CIEN and South London LAEP subregions.

What is the UK power network dataset?

The dataset provides detailed information about UK Power Networks' Grid and Primary Sites. It includes key characteristics such as: This data is useful for understanding the infrastructure and capacity of the electricity network across its regions. The data is provided "as is";.

Where is National Grid's new Bengeworth Road substation?

National Grid's new Bengeworth Road substation is situated in the centre of its 32.5km London Power Tunnels 2 route between Wimbledon and Crayford, and will provide a 132kV connection for local grid operator UK Power Networks to distribute electricity on to homes and businesses in the area.

How many large-scale energy generation sites are there in London?

It includes details of nearly 1,000 large-scale energy generation sites connected across London, the South East and East of England in a range of maps and tables. To offer the best experience we've built the portal on an external platform hosted by OpenDataSoft.

This repository contains the data for paper titled "The Generator Distribution Problem for Base Stations during Emergency Power Outage: A branch-and-price-and-cut approach";.

National Grid has launched a new 132kV substation in Barking, East London, aimed at enhancing electricity supply to local residents, businesses and rail services amid ...

National Grid has launched a new 132kV substation in Barking, East London, aimed at enhancing electricity supply to local ...

Around the world, coal-fired power stations around the world were often located along rivers because barges of coal needed to come upstream to the power stations built near ...

A 178 tonne supergrid transformer and specialist SF6-free technology arrived at National Grid's new 400kV Bengeworth Road ...

Abstract -- An overview of research activity in the area of powering base station sites by means of renewable energy sources is given. It is shown that mobile network ...

This dataset reports on UK Power Networks' use of paid flexibility services. UK Power Networks uses flexibility (demand/generation turn up/down) in London, the South East, and the East of ...

Our Open Data Portal features the UK's biggest set of information about the electricity network. The online portal brings together thousands of datasets from a vast range of sources to ...

Bibliographic details on The generator distribution problem for base stations during emergency power outage: A branch-and-price-and-cut approach.

The newly energised transmission circuit serves around 340,000 properties in South East London, supplying power onwards to UK Power ...

IntroductionMethodological ApproachAssurance StatementOtherThe dataset provides detailed information about UK Power Networks" Grid and Primary Sites. It includes key characteristics such as: 1. Spatial coordinates of each site 2. Year commissioned 3. Asset counts against each site 4. Power transformer count 5. Local authority information 6. Winter and summer demand 7. Transformer ratingsSee more on ukpowernetworks.opendatasoft.com UK Power NetworksOpen Data | UK Power NetworksOur Open Data Portal features the UK's biggest set of information about the electricity network.
