# The latest plan for the construction of energy storage power stations in Ukraine

What does DTEK's new energy storage system mean for Ukraine?

The new project aims to strengthen Ukraine's energy security and support the transition to a greener energy system. DTEK Group aims to commission the new storage systems by September 2025.

Will DTEK build a 200MW battery energy storage system in Ukraine?

DTEK unveils EUR140m plan for 200MW battery energy storage systems in Ukraine. (Credit: DTEK) DTEK Group, a private investor in Ukraine's energy sector, has announced a EUR140m investment plan to construct a series of battery energy storage systems (BESS) in the country with a combined capacity of 200MW.

Can battery technology decentralise Ukraine's energy system?

Battery technology plays a crucial role in decentralising Ukraine's energy system to mitigate the impact of energy supply disruptions caused by Russia, said the energy investment company.

Why is DTEK investing EUR140m in a battery energy storage system?

(Credit: DTEK) DTEK Group, a private investor in Ukraine's energy sector, has announced a EUR140m investment plan to construct a series of battery energy storage systems (BESS) in the country with a combined capacity of 200MW. The new project aims to strengthen Ukraine's energy security and support the transition to a greener energy system.

DTEK and Fluence, a global leader in energy storage, have announced the early deployment of this project. The 200 MW system, ...

The EUR140 million total investment aims to enhance power grid stability, bolstering Ukraine's energy security and independence. The project is split between six energy storage ...

The project envisages the construction of 5 energy storage facilities with a total capacity of 180 MW. In total, the company plans to build 6 energy storage facilities in different ...

DTEK and Fluence, a global leader in energy storage, have announced the early deployment of this project. The 200 MW system, spanning six locations, is in its final phase, ...

The IEA estimates Ukraine would need to add around 4 GW of distributed PV per year until 2030 (over 24 GW in total) to create a more decentralised and secure power system ...

A report by the International Energy Agency (IEA) recommends three strategies to accelerate the deployment of distributed solar and battery energy storage systems (BESS) in ...

The new project aims to strengthen Ukraine's energy security and support the transition to a greener energy system. DTEK Group aims to commission the new storage ...

---

The funding will cover the construction of five energy storage installations with a combined capacity of 180 MW. DTEK's overall plan includes six storage facilities totaling 200 ...

The plan to link Ukraine's energy mix with that of the European Union includes up to 1 GW of clean power and energy storage facilities in neighboring Poland. DTEK, in August ...

Press releaseSubscribe to our news 0:000:00 DTEK is to build a series of energy storage systems in Ukraine with a capacity of 200 MW to help build a secure and green ...

The new project aims to strengthen Ukraine's energy security and support the transition to a greener energy system. DTEK Group aims ...

According to DTEK in a release, energy storage systems are one of their strategic priorities going forward, allowing the country to depend more on thousands of decentralised ...
