# **The reason why Congo does not use base station communications**

Which radio station is allowed in the Republic of the Congo?

In the Republic of the Congo, private radio and television stations are allowed alongside the public broadcaster, Radiodiffusion Television Congolaise. Freedom of speech is severely curtailed in the country.

Is the Democratic Republic of the Congo lagging behind in telecommunications?

Compared to the United States, the Democratic Republic of the Congo is massively lagging behind in the development of telecommunications. Under the country code +243, there were a total of 49.86 million connections in 2023. Among them were 49.80 million mobile phones, which corresponds to an average of 0.49 per person.

Why is phone saturation lagging in the Republic of the Congo?

Phone saturation in the Republic of the Congo is strong, but supporting infrastructure, particularly for data communications, is lagging. Internet penetration is extremely low, and costs are high, providing significant room for competition and growth in that sector.

How many people in the Congo have broadband?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. The Democratic Republic of the Congo is lagging behind in the expansion of broadband internet connections. Around 31 percent of all residents have access to the internet.

This chapter discusses the development of the Congo's telecommunications sector. It presents the state of telecommunications in the Congo as of the mid-1990s and assesses the obstacles
