
Tirana Solar PV Panels

How much solar energy does Tirana produce a day?

Average 5.74kWh/day in Spring. To maximize your solar PV system's energy output in Tirana, Albania (Lat/Long 41.3253, 19.8184) throughout the year, you should tilt your panels at an angle of 35°; South for fixed panel installations.

How should solar panels be positioned in Tirana?

In Autumn, tilt panels to 45°; facing South for maximum generation. During Winter, adjust your solar panels to a 56°; angle towards the South for optimal energy production. Lastly, in Spring, position your panels at a 33°; angle facing South to capture the most solar energy in Tirana, Albania.

How to optimize solar generation in Tirana?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Tirana, Albania as follows: In Summer, set the angle of your panels to 25°; facing South. In Autumn, tilt panels to 45°; facing South for maximum generation.

Solares specializes in solar energy solutions, offering a variety of certified products such as solar panels and off-grid systems, enabling individuals and businesses to generate photovoltaic ...

Optimize your solar installation with PVGIS, the leading photovoltaic calculator! Do you want to estimate the solar electricity production of your solar panels before investing in a photovoltaic ...
