
Transformer breaker in China in Romania

Can I use a transformer in Romania?

Electricity supplies worldwide can vary from anything between 100V and 240V. It can be extremely dangerous to use an electrical appliance that is rated at a voltage different from the supply. As voltage can differ from country to country, you may need to use a voltage converter or transformer whilst in Romania.

Who makes transformers in Europe?

The SGB Group has become today's number one medium-sized manufacturer of transformers in Europe.
