# Uninterruptible power supply module AC

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supplies (UPS) Phoenix Contact uninterruptible power supplies (UPS) continue to deliver power even in the event of mains failure. They offer UPS solutions for AC and DC applications and protect your system against power supply failure.

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

What is a Phoenix Contact uninterruptible power supply?

Phoenix Contact uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select your AC UPS - intelligent with IQ technology or space-saving with integrated energy storage. Monitor and optimize your energy storage with the uninterruptible power supply for AC applications with IQ technology.

What happens if the AC ups fails?

If power failure, under or overvoltage occurs, the AC UPS switches into the safe backup mode and supplies the PC via the integrated battery. The connected UPS management software ensures a safe shutdown in the event of a long power failure. The reboot function automatically initiates the restart of the PC when AC mains voltage returns.
