# Unloading of container solar panels

What if a container is unloaded on the unloading platform?

If the container is unloaded on the unloading platform, it is required to be used with the unloading platform or tooling. The height of the unloading platform and the height of the unloading tooling should be kept at the basic level with the bottom of the container (loading bottom plate), and the height tolerance should be controlled within  $\pm 10$ mm.

How to pack a solar module?

SOLAR MODULE PACKING AT CITIZEN SOLAR PVT LTD 15.1. GENERAL Every alternate module is protected by corner protectors as shown below, this helps in protecting the module edges from any scratches on the AL frame. Inside the box each module is placed vertically. Put the module into the carton from one side with protector on four corners.

How to unpack PV modules?

Unpacking of PV modules should always be done in the vertical manner by two persons as shown in the diagram. Also care should be taken for falling over one module to the other inside the packing box. Modules should be stored in a dry and ventilated environment to avoid direct sunlight and moisture.

Can you carry a solar module alone?

Do not carry a module alone; always use two people to lift and carry. The LONGi team of industry veterans and experts is excited to partner with you for success from arrival to installation with LONGi's PV solar modules.
