What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock)

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

How much does a ground-mounted solar project cost in Vietnam?

The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects. Vietnam's Ministry of Industry and Trade (MIOT) has set new price ceilings for the so-called "transitional" wind and solar projects.

How much does a solar project cost in Vietnam?

Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low. In January 2023, the top rate was NT\$1.49/kWh for ground-mounted solar and NT\$1.89/kWh for floating solar, with no regional or storage-based distinctions.

How do solar tariffs work in Vietnam?

Under the revised tariff framework, solar installations are categorized into ground-mounted and floating types, and are further segmented by region--North, Central, and South Vietnam. Rates are adjusted based on factors such as solar resource availability, cost structure, and local grid demand. The inclusion of storage also affects pricing.
