# Vilnius 2025 Energy Storage Power Station

What is E-Energija doing in Lithuania?

E-energija Group has commenced construction on Lithuania's largest battery energy storage system(BESS) project, the 120MWh Vilnius BESS. This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity by around 50%.

When will Vilnius BESS become operational?

The Vilnius BESS is scheduled to become operational by the end of 2025. Partners in the project include Power Electronics and CATL - Contemporary Amperex Technology Co Limited, which will supply the energy storage equipment, and local BESS integrator Nord energija, which will provide its proprietary NordNest smart energy management system (EMS).

What is Lithuania's largest battery storage facility?

This project will become Lithuania's largest battery storage facility that is privately owned, boosting the country's total storage capacity by approximately 50%. The project is located near Vilnius and will be operational by the end of 2025.

What is Lithuania's first commercial battery storage facility?

Located near Vilnius, this project will be the country's first commercial battery storage facility and is expected to increase Lithuania's total storage capacity by approximately 50%. The system is scheduled to begin operations by the end of 2025.

The Vilnius BESS is scheduled to become operational by the end of 2025. Partners in the project include Power Electronics and CATL - Contemporary Amperex ...

3. Lack of safety and standards. In 2023, multiple overseas energy storage power station fire accidents caused the industry to pay high attention to safety, but the global unified ...

Origin Energy (Origin) has approved the third stage of its large-scale battery at Eraring Power Station, adding further storage capacity to the project already underway and ...

The first commercial energy storage systems will be installed in Vilnius this year - MadeinVilnius.lt The management solution planned for Vilnius BESS, NordNest, was ...

About the project Energy Cells installed and integrated a system of four energy storage batteries parks with a total capacity of 200 megawatts (MW) and 200 megawatt-hours (MWh) into ...

The 120MWh battery energy storage system (BESS) project near Vilnius, the capital of Lithuania, will come online by the end of 2025. ...

Vilnius BESS 2025 Q4 Lithuania's first commercial battery storage facility will feature a 120 MWh capacity smart battery storage system. This project will become Lithuania's largest

---

battery ...

Helsinki, 1.7.2025 --E energija group and Capalo AI have signed an agreement to trade and optimize the 120 MWh Vilnius Battery Energy ...

Vilnius BESS 2025 Q4 Lithuania's first commercial battery storage facility will feature a 120 MWh capacity smart battery storage system. This project ...

Grid-scale, long-duration energy storage has been widely recognized as an important means to address the intermittency of wind ...

Enter energy storage power stations - the unsung heroes of modern electricity grids. These technological marvels act like giant "power banks" for cities, storing excess ...

Helsinki, 1.7.2025 --E energija group and Capalo AI have signed an agreement to trade and optimize the 120 MWh Vilnius Battery Energy Storage System (BESS), currently under ...
