
We are actively promoting the implementation of energy storage projects

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

How to promote the implementation of independent energy storage stations?

To promote the implementation of independent energy storage stations, it is necessary to further optimise the electricity market mechanism, segments and targets. Investor participation is beneficial for the development of the energy storage industry.

What is MIIT's new energy storage plan?

The plan, jointly issued by eight departments including the Ministry of Industry and Information Technology (MIIT) on Monday, seeks to foster high-quality development in the new-energy storage manufacturing.

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

Foreword Stepping up efforts to develop new energy storage technologies is critical in driving renewable energy adoption, achieving China's 30/60 carbon goals, and ...

China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

An action plan is issued, aiming to build a growth engine such as new generation information technology and new energy, and promote the high-quality development of new ...

At the beginning of this year, the NEA has released a list of 56 new-type energy storage pilot demonstration projects, including 17 lithium-ion battery projects and 11 ...

Policy Support: The Sichuan Provincial Department of Economy and Information Technology and other departments have jointly issued the 'Implementation Plan for Promoting ...

The plan said that the new-energy storage industry is a key source of support for advancing the construction of a manufacturing ...

In the 'Guidance on New Energy Storage', energy storage on the power side emphasizes the layout of system-friendly new energy ...

The Next Imagination of Energy Storage The contradiction between China's excess energy storage capacity and the energy needs of ...

China's nationwide installed capacity of new-type energy storage has exceeded 100 GW, more than 30 times the level at the end of the 13th Five-Year Plan period.

Discover how government policies promoting renewable energy drive global sustainability, reduce emissions, and support green innovation.

These opinions propose accelerating technological innovation in new energy storage, establishing and improving supporting mechanisms, and achieving high-quality development of new energy ...

The plan said that the new-energy storage industry is a key source of support for advancing the construction of a manufacturing powerhouse and promoting the efficient ...
