# West Asia Mobile Portable Power Installation

What is a mobile substation?

Mobile substations are a type of power distribution system that can be transported and installed quickly and easily in different locations. They are used to provide temporary or emergency power supply to areas where the grid is unavailable or has been damaged, such as construction sites, disaster zones, remote areas, or events.

What is a LZY mobile solar system?

LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar arrays, reducing reliance on diesel fuel by 80% and are ideal for mining, factory production and off-grid infrastructure.

What are the design considerations of a mobile substation?

Some of the main design considerations are: Transformer: The transformer is the main component of a mobile substation that converts high voltage to low voltage or vice versa. The transformer has to be designed to optimize its size and weight for transportability and required electrical parameters.

Leading portable power station manufacturers in China | Tritek, Jackery, ECOFLOW, Bluetti, Sunly Power, Super Pack, HAME, VIPTEK, CARKU, SOUOP.
