## What are the 5G base stations in Phnom Penh

Will 5G be available in Cambodia?

KINGTEL has a master plan to build 3,000 base stations of 5G in Cambodia over 2 to 3 years including the first phase of 5G SA core network, transmission network and related technical equipment. It is expected that 5G SA network will be commercially available and accessible for more than 90% of Cambodian population by the end of 2020.

How much spectrum is needed for 5G in Cambodia?

In order to achieve this goal, the government has allocated 200 MHz of spectrum for 5G use. The government has also established a task force to oversee the development and deployment of 5G in Cambodia. Several mobile operators in Cambodia have expressed interest in deploying 5G networks.

How will 5G impact Cambodia?

The rollout of 5G in Cambodia is expected to have a significant impact on the country's economy. 5G is expected to boost economic growth by creating new jobs, attracting foreign investment, and improving productivity. 5G is also expected to improve the quality of life for Cambodians by providing faster and more reliable internet access.

How will Cambodia prepare for a 5G rollout?

As Cambodia prepares for the official rollout of 5G technology, the focus remains on enhancing digital infrastructure, securing necessary spectrum allocations, and addressing any challenges that arise.

Kingtel said it will expand 650 base stations to support 5G and serve customers in Phnom Penh, Sihanoukville, Siem Reap, Battambang, Bavet, Poipet and other major cities in ...
