
What are the mobile base station sites in Lithuania

When will 5G be available in Lithuania?

Intensive development of 5G base stations is planned throughout 2023. The focus will be on the northeastern Lithuania, where all base stations are planned to be updated with Ericsson network equipment. By mid-summer 2023, Telia Lietuva 5G connection will cover 99 percent of Lithuania's territory. 5G devices and plans

Does Telia Lietuva support 5G?

Telia Lietuva customers can use the 5G network without any additional fees - all they need is a "5G payment" plan and a device that supports 5G in Lithuania. Among the 5G-enabled smartphones, the most popular are those from Apple, Samsung, Xiaomi, OnePlus and other smart devices.

What frequencies does 5G use in Lithuania?

5G communication operating in Lithuania uses 3.5 GHz and 700 MHz frequencies. Devices in the 3.5 GHz frequency coverage area will be able to reach speeds of up to 2 gigabits per second (2 Gbps). Where 3.5 GHz can't reach, devices will automatically use the wide coverage 5G connection in the 700 MHz frequency band.

Who is Telia Lietuva?
