
What is the VAT rate for selling energy storage batteries

How will VAT affect solar batteries?

This will help to make it more affordable for the average household to invest in a battery storage system and utilise their solar panels more efficiently. The change in VAT on solar batteries occurred on February 1, 2024. Any solar battery now purchased is under the new VAT rate and will be significantly cheaper.

Are solar batteries VAT free?

As with many government initiatives, the VAT-free status of solar batteries is only set to last for a while. The deadline to enjoy the 0% VAT lasts until the 31st of March 2027. However, at this point, it will be subjected to 5% VAT rather than returning to the previous 20% VAT rate.

What is the VAT rate on solar?

VAT on a range of domestic energy efficiency and renewable energy installations, including solar, is now 0% in Great Britain. This is a reduction from the previous rate of between 5% and 20%. Eligible installations are those included on the Government's list of Energy Saving Measures (ESMs).

Will a 0% VAT on solar batteries be a good idea?

Before December 2023, all solar batteries were subjected to 20% VAT. However, in December 2023, the government acknowledged that implementing a 0% VAT on solar batteries would be beneficial in encouraging householders to embrace new technologies and work towards a greener Great Britain.
