# What is the size of the solar panels on the roof of Lobamba

How big should a rooftop solar system be?

A common configuration for an array of this size might be 10 rows of 25 panels each. Using the average solar panel size of 6 feet by 3.25 feet, and assuming you leave minimal space between the panels, your rooftop solar system would measure roughly 4,875 square feet. Now, let's consider the weight of that system.

How big is a 72-cell solar panel?

The average 72-cell solar panel size measures 3.25 feet by 6.42 feet and is laid out as a 6 x 12 grid, making them almost a foot taller than the 60-cell standard size panels. Given their large physical size, 72-cell solar panels may be awkward to carry, which is why two people are often required for installation.

What are the different sizes of solar panels?

There are three main sizes of solar panels to know: 60-cell, 72-cell, and 96-cell. For commercial and residential solar panels, the 60-cell and 72-cell solar panels size are most commonly used as the 96-cell measures 17.5 square feet - which can make for a challenging fit on your roof.

What are the dimensions of a 96-cell solar panel?

96-cell solar panel size. The dimensions of 96-cell solar panels are 41.5 inches long and 63 inches wide. That's a 41.5" x 63" solar panel.
