Are portable power stations a good idea?

Portable power stations can power and charge electronic devices off the grid. They don't burn fossil fuels, so they're cleaner, quieter, and require minimal maintenance compared with gas- and diesel-powered generators. They can be recharged using solar panels and home electrical outlets. What are the disadvantages of portable power stations?

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.

What accessories do you need for a portable power station?

One of the most common accessories is going to be a cord to connect to similar power stations in series, often times doubling your power output. Some portable power stations have a light bar built into the housing, which is useful for seeing at night. Anker's Solix C300 also includes a pop-up camping light.
