# Which has more 5G base stations or communications in Indonesia

Does Indonesia have a 5G network?

Yet, its adoption hinges on overcoming challenges like infrastructure, spectrum efficiency, and cost. Indonesia, despite having a vast user base such as that of Telkomsel, the country's largest digital communications provider, trails behind countries like Australia, which leads with a 54% 5G penetration rate.

Does Telkomsel have a 5G network in Indonesia?

DENPASAR, Indonesia, Aug. 29, 2024 /PRNewswire/— Telkomsel, a leading pioneer of 5G connectivity in Indonesia, has announced a significant expansion of its Hyper 5G network, beginning with Denpasar and Badung in Bali.

Which companies are deploying 5G in Indonesia?

Indonesia's major operators have each taken a targeted approach to 5G. Telkomsel, for instance, has established a leading presence by deploying over 2,100 5G sites across 56 cities, with a focus on key urban and industrial centers.

Why should Indonesia invest in 5G?

Key hurdles include fiberization, expensive infrastructure, and devices that are priced out of reach for much of Indonesia's population. However, strategic investments in 5G can bridge these gaps, unlocking innovation, economic growth, and a globally competitive digital future for Indonesia.
