## Wholesale 5kwh battery backup in Sydney

How much does a 5kw battery storage system cost?

So for a 5kW system you might be looking at a total for the battery storage of around \$7,000 to \$10,000. The average time (industry wide) it takes to recover that initial outlay through reduced power costs is now below 10 years. We aim to design systems that will provide 100% payback in less than 4 years.

What is a 5kwh solar battery?

A 5kWh solar battery keeps up to 5 kilowatt-hours of electricity--typically enough to run vital devices like your fridge, lights, internet router, and maybe a load of laundry after sunset. Across Australia, where solar adoption is rising rapidly, more homes are turning to these smaller-sized batteries for both cost savings and energy independence.

How much does a battery backup cost?

Adding battery backup can provide some real benefits but it pays to do your research because batteries are still relatively expensive. A battery system for a 5kW solar unit costs generally between \$1,300 to \$2,000 per kWh. So for a 5kW system you might be looking at a total for the battery storage of around \$7,000 to \$10,000.

Why is a 5kw solar system so popular in Australia?

The 5kW solar system is extremely popular for the average Australian household (using around 25kWh of power daily) because it provides an outstanding ROI (return of investment). The high rates of power production easily balance out the relatively low cost of installation.

I will walk you through solar battery prices, paybacks and brands in Australia so you can decide whether a battery is worth it for you. Then, ...

Prishda Energy provides eco-friendly lithium-iron phosphate batteries, chargers, and solar panels. Top suppliers in Australia for energy storage.
