
Yaoundé Resort Uses Folding Container Automated Type

What is a foldable container?

It is, therefore, suitable for use by shipping lines and terminals. Foldable containers save up to 75% space and costs (50-60%). One standard container takes up as much space as four foldable ones. In addition, they are more environmentally friendly. The transport of foldable containers generates 37% less carbon dioxide.

Are foldable containers better than traditional containers?

Foldable containers are more expensive than traditional ones. Innovative containers are more susceptible to damage and have a shorter lifespan. Despite these disadvantages, foldable containers are a transport solution of the future. They not only save space, time, and money but also lower your carbon footprint.

Who makes foldable containers?

HCL is not the only company that produces foldable containers. Another example is Staxxon, an American manufacturer of accordion-like foldable containers. They are ISO approved and will be commercially available in 2023. They can be folded and unfolded by two people or with Material Handling Equipment (MHE).

What are the disadvantages of a foldable container?

Due to features like folding joints, they are a bit heavier than a typical box. Foldable containers are more expensive than traditional ones. Innovative containers are more susceptible to damage and have a shorter lifespan. Despite these disadvantages, foldable containers are a transport solution of the future.
